

# How-To Use Toothbrushes, Acrylic Paint and Paper to Create Your Own Artwork

by Mei Huei Chin

## Materials

Palette  
Paper  
Stencil  
Acrylic Paint  
Water  
Toothbrushes  
Kitchen paper towels.

## Instructions

1. Place the stencil on top of the paper.
2. Use the tooth brush to mix the paint well with a few drops of water. Only a little bit paint is needed.
3. Dip the toothbrush lightly into the paint. Make sure the toothbrush is not too wet to prevent the paint from dripping to the paper.
4. Hold the palette over the stencil covered paper and press/slide the toothbrush against the edge of the palette to flick the paint onto the paper.
5. Continue doing this until the paper is covered with enough paint to show the pattern through the stencil cutouts. Let the paint dry a little bit, or carefully remove the stencil if the paint is still wet.
6. Although the how-to video is only one minute long, the whole process might take 10-20 minutes to finish.
